BIOGRAPHY

Author was born in Surabaya on February 4th, 1977, from the parents Handrijanto Tjandrakusuma and Sutrisni Limantara. Author grew up with her younger sister, Dina Rosita, in Surabaya.

In 1996 Author started her study in Institut Teknologi Bandung (ITB) and graduated in 2001 with a bachelor degree of Engineering Physics. In year 2000 as a part of the study Author had vocational job training with the company Endress+Hauser GmbH in Maulburg, Germany, where Author encountered her first challenges to write proposals and reports in foreign languages.

In early 2002 Author worked for Makro Retails as a management trainee in Jakarta. In June 2002 Author started her career in PT. Baker Atlas Indonesia (Baker Hughes) as a wireline field engineer and spent most of her time in oil and gas drilling and production facilities (onshore and offshore) in Sumatera, Java, Kalimantan, Natuna Sea, and Maluku Isles.

In 2008 Author started to pursue her interest to broaden her knowledge in agricultural business by enrolling to Program Studi Manajemen dan Bisnis, Sekolah Pascasarjana, Institut Pertanian Bogor (IPB) and applied for a position as technical/sales representative in the same company to accommodate the study.
ACKNOWLEDGEMENT

This research was conducted as a partial fulfilment of the requirements for attaining a Master Degree in Program Studi Manajemen dan Bisnis, Sekolah Pascasarjana, Institut Pertanian Bogor. The objective is to improve the competency of the graduate students.

This research was conducted in several small and medium scale Vannamei shrimp farms on the northern shore of East Java, where in-depth interview and observations have been done. This research also involved in-depth interviews with experts in shrimp industry and main actors in shrimp value chain.

The execution of this research was not an easy task. In this opportunity Author would like to express her gratitude to the persons who have given their valuable support and assistance:

1. Dr. Ir. Sri Hartoyo, MS as advisory committee who has provided continuous guidance and support throughout the preparation and execution of this research.

2. Dr. Ir. Sukardi, MM as advisory committee who has provided continuous guidance and support throughout the preparation and execution of this research.

3. Respondents of this research who has provided valuable information and knowledge sharing.

4. Author’s colleagues in Sustainable Business Development classes (batch one and batch two) who have shared valuable insights and provided support.
5. Author’s colleagues in Executive 30 class who have shared valuable insights and provided support.

6. Author’s parents, family and friends who have provided continuous moral support and encouragement.

7. Author’s supervisor and colleagues in Baker Hughes who have provided moral support and great understanding of Author’s occasional absence.

Despite Author’s continuous efforts, this research is far from perfect. Author appreciates questions, critiques and suggestions from the readers and hopes that their contribution will improve the future researches.
