ABSTRACT

Performance Analysis of the Regional Auditing Agency (Bawasda) in the Regency of Siak.

Wan Sri Saadun

The aims of this research are to:
1. Analyze the performance of the Regional Auditing Agency in the Regency of Siak.
2. Analyze factors which correlation towards the performance of the Regional Auditing Agency in the Regency of Siak.
3. Formulate an alternative strategy to improve quality auditing.

This research examines the dimension of Performance, Apparatus Resource, Auditing and Evaluation Manual, Transparency, and Action. The method used to analyze these correlation is the Spearman Correlation Method. Results of this research shows that there is correlation between apparatus resource, auditing and evaluation manual, and transparency and the performance of auditing. There is, however a high correlation between action with the performance of auditing. In performing their task, auditors are usually considered to look for mistakes such that Actions really do influence Performance. If auditors do not take action towards their findings, performance will be low, if they do, performance will be high and the process of auditing can be viewed as successful.
