ABSTRACT

Study of Implementation of School Based Management Policy at Elementary Education in Province of Daerah Khusus Ibukota Jakarta

Maju Lumban Tobing

This research has three main target, they are: a). descriptively how is the implementation of policy of School Based Management (SBM) at elementary school in province of DKI Jakarta, b). explaining the problems/obstructions of the implementation of the policy of school management on SBM, c). formulating the steps or strategic to streamline the execution of the policy of school management on SBM which can upgrade the elementary school quality. In accomplishing this goal the writer uses two analysis techniques to process data, they are span the criterion analysis and strategic analysis based on David concept (2004). The research is done to 83 respondents of school member and five respondents of Official Elementary Education of DKI Jakarta Province which gives the following result: 1). Generally, school member could understand the policy concept of SBM which is socialized by government. However, either various aspects concern with the context of SBM either aspects of education function which is decentralized in to school not be totally understand by school member, 2). The decentralization of education functions at the period of the test of school management policy of SBM at five state elementary school in five region of municipality of Province DKI Jakarta could not be implemented as it is hoped. These are the effect of less education of Headmaster and teacher so that they are unqualified to do the function of decentralized education effectively in school. Therefore, the dissemination of SBM has not applied by Official of Elementary Education of DKI Jakarta Province to all elementary school exist in Province of DKI Jakarta, 3). For those all four alternatives gained this research, the priority which is implemented by the Official of Elementary Education of DKI Jakarta Province to implement the policy of school management on SBM is WO Strategy, because this strategy has the total attractive score from the other strategy.
