

## ABSTRACT

### **Analysis of Secondary Reserve Management at ABC Bank to Increase Interest Income**

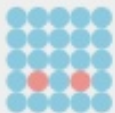

(Gatoet Gembro Noegroho)

*The purpose of this study was to determine the optimum value of the secondary reserve (SR) at ABC Bank. The data were collected at the Treasury Departement of ABC Bank for the period of 5 months starting from Nopember 2002. Using Risk Management as back testing methode of analysing the research compared the optimum value and the realization of the SR.*

*The research focus that the amount of SR actually hold by ABC Bank was almost doubled of that of its optimum value. This mean that the bank should lost gained more interest income. It's suggested that the management of ABC Bank keep maintaining the SR at the lower or upper level of the optimum SR. To anticipate the extreme condition that might happened, it's recommended that the management uses traffic light monitoring analysis based on potential decrease on SR.*
